I am a full-stack software developer specialising in frontend software development for both web and mobile. I take great pleasure in learning new technologies and architecting scalable, clean and performant applications.

WORK EXPERIENCE

LEDGA FINANCE
Senior Frontend Developer | Jan 2022 - Present, *full-time*

- Led the frontend team of three developers in building the flagship web product of Ledga using HTML, CSS, Javascript, React and Tailwind CSS
- Collaborated with the UX team in working the design system. Helped supplement implementation of UI/UX design and development experience.
- Collaborated with the backend team on API Design that better suits the vision of the frontend and UI/UX team for the User Interface design.
- Currently working as part of the mobile app team building a cross-platform mobile application for Ledga using Flutter and Nodejs, MongoDB and Typescript.

CHOPWELL
Fullstack mobile Developer | August 2022 - Present, *contract*

- Building a fullstack, cross-platform food delivery application with consumer, merchant and rider application for chopwell Ltd using dart, flutter, Nodejs, Postgres and typescript.

CLOUDDUST
Frontend Developer| Mar 2021 - Jan 2022, *fulltime*

- Collaborated with team members in the frontend and backend to refactor clouddust's website into a modern techstack using Nodejs, HTML, CSS, React, NextJs, Typescript and Styled-Components.

MOWAYMART LTD
Junior Backend Developer | Dec 2019 - Sep 2020, *internship*

- Implemented a simple webpage for tracking mowaymart inventory across various locations facilitating automatic movement of stocks from one location to another using Python, Django, HTML and CSS.
